FIRST AID

BLEEDING

The best way to control bleeding is with direct pressure applied over the wound. Use a pad of sterile gauze, if one is available. However, a clean hankerchief or a bare hand will do. Apply firm, steady pressure for 5–15 minutes. If bleeding is from a foot, hand, leg or arm, use gravity to help slow the flow of blood by elevating the limb so it is higher than the victim's heart. If you suspect head injuries or internal bleeding, call for help immediately.

BROKEN BONES

Do not move the victim unless he or she is in immediate danger of further injury. Keep victim warm and calm to prevent shock. Call for emergency help. Do not attempt to push bone back into place if it is sticking out of the skin. Do not attempt to straighten fracture. Do not permit victim to walk about.

CHOKING

Do not interfere with a choking victim who can talk or breathe. But if a conscious person cannot speak, cough or breathe, stand just behind and to the side of the victim. Support the victim with one hand to the chest. The victim's head should be lowered. Give four sharp blows between the shoulder blades. If unsuccessful, stand behind the victim, wrap your arms around his or her middle, just above the navel. Clasp you hands together in a doubled fist and press in and up in quick thrusts several times. If still unsuccessful, make your pointer finger into a hook shape and reach down the victim's throat in sweeping motion, feeling for the object. If the object has not been retrieved, but the swallower suddenly seems all right, play it safe and take him or her directly to the hospital. This is especially critical if the swallowed object is a jagged object that could cause internal damage.

DROWNING

Get the victim out of the water at once. Turn the victim face down. Allow only a few seconds for water to drain from the lungs. If the victim coughs and sputters and starts breathing without assistance, he or she will get rid of the remaining water. Stand by to see that recovery continues. If the victim is not breathing, turn the victim over onto his or her back and start mouth-to-mouth resuscitation immediately. Have someone else go for help. Do not leave the victim alone under any circumstances - not even to call for help! Keep rescue breathing until the victim can breathe unassisted. That can take an hour or two. Pace yourself. Keep calm. Even when the victim is breathing unassisted, he or she may be in need of medical attention. Get professional emergency assistance at once.

DRUG OVERDOSE

Call for emergency help at once. Check the victim's breathing and pulse. If breathing is stopped or weak, give mouth-to-mouth resuscitation. Cover the victim with a blanket for warmth. Do not throw water on the victim's face. Do not give liquor or a stimulant. A drug overdose is a poisoning. Alcohol is as much a poison as drugs. Do not take drunkenness lightly. Too much alcohol can kill.

You decided to be an organ and tissue donor.

But you didn't tell your family.

Then you haven't really decided to be a donor.

Right now, thousands of people are dying, waiting for transplants. If you've decided to be an organ and tissue donor, you must tell your family *now* so they can carry out your decision later. To learn more about donation and how to talk to your family call **1-800-355-SHARE.**

Nuclear Emergency P

There are four classes of emergencies at nuclear power plants:

NUE – NOTIFICATION OF UNUSUAL EVENT

This is the least serious emergency class. It means that something out of the ordinary has happened. People living in the area should not have to take any action.

ALERT

This class means plant safety could become a problem. State and local officials will go to their emergency centers to follow the situation. The general public should not have to take any action.

SAE – SITE AREA EMERGENCY

This class means the public might be affected. You should hear the Emergency Warning System. Tune into your local radio station for information. State and local officials will take action to protect those living in the area.

GE – GENERAL EMERGENCY

This is the most serious emergency class. State and local officials will take action to protect people in the area. Stay tuned to your local radio station for instructions. Within 15 minutes of the time an emergency is declared at Arkansas Nuclear One, *Entergy Operations, Inc.* must notify state officials. State officials can then notify the public of an emergency within 15 minutes by use of the Emergency Warning System. You will hear a steady siren signal lasting about 3 minutes. If you have a NOAA weather radio, it will be activated.

PLEASE STAY CALM!

When you hear the sirens, tune to a local radio station for information.

EVACUATION PROCEDURE

Look at the area map on the next page and find out which Care Center you would go to and how you would get there. If an evacuation begins, don't rush, you'll have time. When you leave home, tear out the **"NOTIFIED"** tag from the back of your Emergency Instruction Booklet. Attach the tag to the front of your home so officials will know you have gone. As you leave the area, tell a neighbor about the evacuation. They may not know about the evacuation and may need a ride to a Care Center. You may need to stay at the Care Center for two or three days. This will depend on conditions at the plant. Listen to the radio for current information.

SCHOOL EVACUATION PROCEDURE

Schools will be notified before the general public and students will be taken to a Care Center. Parents should not attempt to pick up their children at the schools since this will create a traffic problem. Once children are registered at the Care Center, they may leave with a parent or legal guardian. If it is necessary, students will be monitored for radioactive contamination.

WHAT ABOUT SHELTERING?

Sheltering means to stay indoors. Close all doors and windows. Turn off sources of outside air. (You may also be advised to stay indoors and leave your air conditioning on at times of extreme heat.) Close the fireplace flue if not in use. Remain indoors until told it is safe to go out. Use the telephone only for medical, fire or other extreme emergencies. If traveling in a vehicle, close windows, air vents, and put air conditioner on the maximum setting if needed. Listen to your local radio station for further instructions.

ABOUT YOUR PETS

For reasons of health and safety, it is strongly recommended that pets not be brought to any designated care center, however, it may be necessary under certain circumstances to do so. While pets will not be allowed inside the actual care center, facilities will be provided for the housing of your pet. Animals should be transported in, and remain housed in, portable containment devices while at the care center. Care for these animals will be the responsibility of the owner. Veterinary care will be provided by the pet's owner. Liability for any harm or damage caused any animal while at the care center will also be the responsibility of the owner.

"AFTER YOUR INJURY FROM ANY KIND OF ACCIDENT, YOUR COMPENSATION SHOULDN'T BE THE HARDEST PART TO DEAL WITH"

If you've been injured in an accident that wasn't your fault, I know you're concerned about getting your medical bills paid . . . about whether your injuries will be fairly compensated...about not hearing from anyone...and about being compensated for your injuries.

Even though you may not know it, let me tell you up-front that **you have the right to be compensated for your medical expenses, lost wages, permanent injury, mental anguish, pain and suffering, and for the loss of quality of your life.**

But to get it, there are certain things you need to know now! That's where I come in.

Callis L. Childs

Helping You Get Fair Compensation

My name is Callis Childs. And I'm a personal injury attorney who has helped recover millions of dollars for clients just like you as fair and just compensation for injuries they've suffered because of someone else's negligence.

Without hassles and frustrations on your part. Because we deal with all the issues for you.

In fact, I'm available statewide 24 hours per day, and, I'll come to you if you're not able to come to my office.

3 Mistakes You Should Never Make

Accident insurance almost always pays for it, but all too many people injured in an accident make at least 1 of 3 common mistakes, which later come back to haunt them. Let me briefly tell you what they are . . . and how to avoid them.

1) The most common health mistake you could regret for years: not getting treated for your injuries. Without treatment you're going to be laid up longer than you need to be. And it makes any claim you file look fake if you wait.

2) Trying to take care of the injury claim yourself. The problem with your doing this yourself is that you do not know what to do to protect yourself. I can virtually promise you that if you try to handle it yourself, you'll be taken advantage of.

3) Not getting fully compensated for your injuries. You may be due much more than you think. An attorney experienced in personal injury cases can get you more compensation in your pocket than you can get by yourself.

Equally as important as our system, is our service. Here's what you'll always get from me:

2) **The answers you need in plain English.** In your language we explain your rights and options and tell you what we recommend.

4) **No initial fee.** Plus, after the free case review, I only get a fee if I successfully get you a settlement.

5) **We act.** When you give us the go ahead, we deliver what we promised.

"AFTER YOUR INJURY FROM ANY KIND OF ACCIDENT, YOUR COMPENSATION SHOULDN'T BE THE HARDEST PART TO DEAL WITH"

Callis L. Childs
Attorney
501-327-1700
1-888-216-7613
243 U.S. Hwy. 64 E.
Conway, AR

No amount of money can ever compensate for your injuries, but it can help make your life easier.

With the right advice and action by us, you can be sure that you'll be fairly compensated for your injuries.

As a service, I'd like to buy you an hour's worth of my time for a FREE case evaluation to learn what kind of compensation you're entitled to.

And how to get it.

At your evaluation you'll learn:

- ✓ **What precise steps to take-and when-to get you fairly compensated for your injuries;**
- ✓ How to get your medical bills paid for your injuries;
- ✓ **How to get fairly compensated for your injuries;**
- ✓ How we'll handle the entire process for you, so you don't have to go through the stress;
- ✓ **Why you must start your case as soon as possible.**

For even more information, see my website at www.arkansas-injury-lawyer.com.

Plus, you might like to know that I only get a fee if I successfully get you compensated.

So call me now at 501-327-1700 or 888-216-7613 and let me lend you a hand, too, to recover the compensation you are fully entitled to for your injuries.

YOU'VE JUST MISSED THE FIRST SIGN OF BREAST CANCER IF YOU DIDN'T SEE THE SMALL DOT IN THE UPPER LEFT HAND CORNER. Because it can start that small inside your breast. That's why a yearly mammogram is a must, especially if you're over 50. Doctors agree that the older you get, the higher the risk of breast cancer. But early detection increases your chance of successful treatment. While you may have missed the first sign of breast cancer, a mammogram won't. For more information, please call the American Cancer Society at **1-800-ACS-2345**.

YOU'VE JUST MISSED THE FIRST SIGN OF BREAST CANCER IF YOU DIDN'T SEE THE SMALL DOT IN THE UPPER LEFT HAND CORNER. Because it can start that small inside your breast. That's why a yearly mammogram is a must, especially if you're over 50. Doctors agree that the older you get, the higher the risk of breast cancer. But early detection increases your chance of successful treatment. While you may have missed the first sign of breast cancer, a mammogram won't. For more information, please call the American Cancer Society at **1-800-ACS-2345.**

International Symbol of Access for the Handicapped

This universal symbol tells handicapped persons–especially those using wheelchairs–that a building or facility is accessible and can be entered without fear of architectural barriers.

Wherever the symbol is displayed, the handicapped can be assured that they will not be barred by thoughtless obstacles or prohibited from participating in the mainstream of society.

International Symbol of Access for the Handicapped

This universal symbol tells handicapped persons–especially those using wheelchairs–that a building or facility is accessible and can be entered without fear of architectural barriers.

Wherever the symbol is displayed, the handicapped can be assured that they will not be barred by thoughtless obstacles or prohibited from participating in the mainstream of society.

ONLY YOU

Burn Debris Disaster Free

Smokey is counting on you to follow the rules for safely burning debris.
1. Check local laws on burning.
2. Don't burn on dry windy days.
3. Clear a 30-foot circle around debris before lighting fire.
4. Keep shovel, rake and water nearby.
5. Don't leave fire unattended by an adult, even for a minute.
6. Consider alternatives to burning:
composting, recycling, or hauling to a landfill.

REMEMBER, ONLY YOU CAN PREVENT FOREST FIRES.

ONLY YOU

Burn Debris Disaster Free

Smokey is counting on you to follow the rules for safely burning debris.

1. Check local laws on burning.
2. Don't burn on dry windy days.
3. Clear a 30-foot circle around debris before lighting fire.
4. Keep shovel, rake and water nearby.
5. Don't leave fire unattended by an adult, even for a minute.
6. Consider alternatives to burning:
   composting, recycling, or hauling to a landfill.

International Symbol of Access for the Handicapped

This universal symbol tells handicapped persons–especially those using wheelchairs–that a building or facility is accessible and can be entered without fear of architectural barriers.

Wherever the symbol is displayed, the handicapped can be assured that they will not be barred by thoughtless obstacles or prohibited from participating in the mainstream of society.

This universal symbol tells handicapped persons–especially those using wheelchairs–that a building or facility is accessible and can be entered without fear of architectural barriers.

ONLY YOU

Burn Debris Disaster Free

Smokey is counting on you to follow the rules for safely burning debris.
1. Check local laws on burning.
2. Don't burn on dry windy days.
3. Clear a 30-foot circle around debris before lighting fire.
4. Keep shovel, rake and water nearby.
5. Don't leave fire unattended by an adult, even for a minute.
6. Consider alternatives to burning:
composting, recycling, or hauling to a landfill.

REMEMBER, ONLY YOU CAN PREVENT FOREST FIRES.

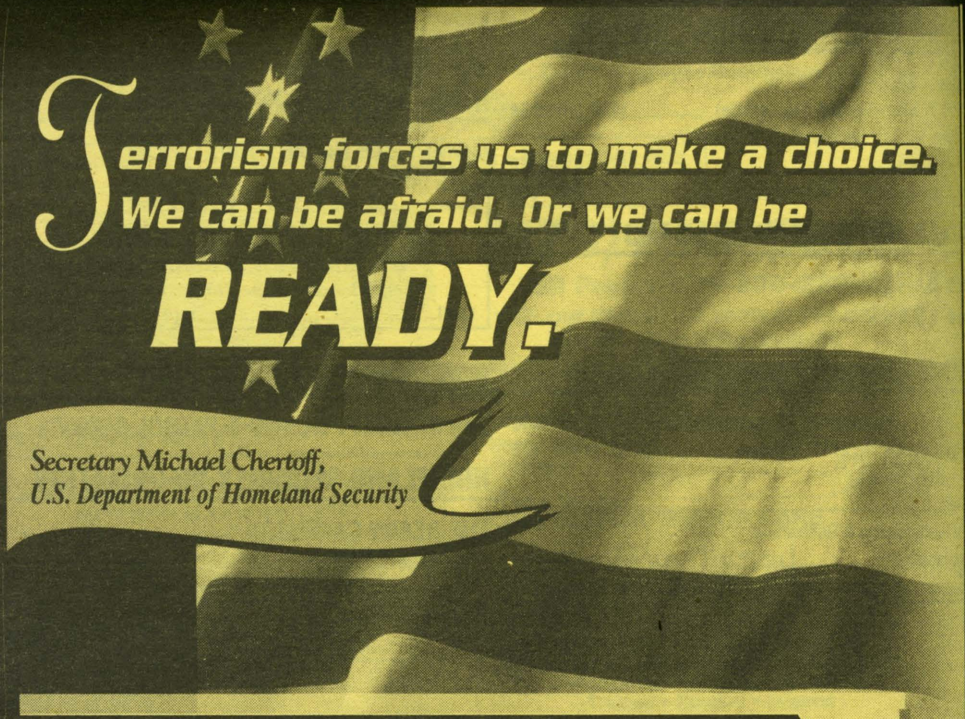
H



Terrorism forces us to make a choice. We can be afraid. Or we can be READY.

Secretary Michael Chertoff,
U.S. Department of Homeland Security

Preparing Makes Sense. Get Ready Now.

The likelihood that you and your family will survive a house fire depends as much on having a working smoke detector and an exit strategy, as on a well-trained fire department. The same is true for surviving a terrorist attack. We must have the tools and plans in place to *make it on our own*, at least for a period of time, no matter where we are when disaster strikes. Just like having a working smoke detector, preparing for the unexpected makes sense. ***Get ready now.***

STEP ONE: MAKE AN EMERGENCY SUPPLY KIT.

Be prepared to improvise and use what you have on hand to make it on your own for *at least* three days, maybe longer. While there are many things that might make you more comfortable, think first about fresh water, food and clean air. ***Consider putting together two kits.*** In one, put everything needed to stay where you are and make it on your own. The other should be a lightweight, smaller version you can take with you if you have to get away.

You'll need a gallon of ***water*** per person per day. Include in the kits canned and dried ***foods*** that are easy to store and prepare. If you live in a cold weather climate, include ***warm clothes*** and a sleeping bag for each member of the family.

Start now by gathering basic ***emergency supplies*** and setting them aside — a flashlight, a battery-powered radio, extra batteries, a first-aid kit, toilet articles and other special things your family may need.

Many potential terrorist attacks could send tiny microscopic "junk" into the air. Many of these materials can only hurt you if they get into your body, so think about creating a barrier between yourself and any contamination. It's smart to have something for each member of the family that ***covers their mouth and nose.***

Plan to use two to three layers of a cotton t-shirt, handkerchief or towel. Or, consider ***filter masks,*** readily available in hardware stores, which are rated based on how small a particle they filter. It is very important that the mask or other material fit your face snugly so that most of the air you breathe comes through the mask, not around it. Do whatever you can to make the best fit possible for children.

Also, include ***duct tape and heavyweight garbage bags or plastic sheeting*** that can be used to seal windows and doors if you need to create a barrier between yourself and any potential contamination outside.

STEP TWO: MAKE A FAMILY COMMUNICATIONS PLAN.

Plan in advance what you will do in an emergency. Be prepared to assess the situation, use common sense and whatever you have on hand to take care of yourself and your loved ones. ***Depending on your circumstances and the nature of the attack, the first important decision is whether you stay put or get away.*** You should understand and plan for both possibilities.

Develop a Family Communications Plan: Your family may not be together when disaster strikes, so ***plan how you will contact one another and review what you will do in different situations.*** Consider a plan where each family member calls, or e-mails the same friend or relative in the event of an emergency. It may be easier to make a long-distance phone call than to call across town, so an out-of-state contact may be in a better position to communicate among separated family members. You may have trouble getting through, or the phone system may be down altogether, but be patient.

Create a Plan to "Shelter-in-Place": There are circumstances when staying put and creating a barrier between yourself and potentially contaminated air outside, a process known as "shelter-in-place," can be a matter of survival. ***Choose an interior room or one with as few windows and doors as possible. Consider precutting plastic sheeting to seal windows, doors and air vents.*** Each piece should be several inches larger than the space you want to cover so that you can duct tape it flat against the wall. Label each piece with the location of where it fits.

If you see large amounts of debris in the air, or if local authorities say the air is badly contaminated, you may want to "shelter-in-place." Quickly bring your family and pets inside, lock doors, and close windows, air vents and fireplace dampers. Immediately turn off air conditioning, forced air heating systems, exhaust fans and clothes dryers. Take your emergency supplies and go into the room you have designated. Seal all windows, doors and vents. Watch TV, listen to radio or check the Internet for instructions.

Create a Plan to Get Away: Plan in advance how you will assemble your family and anticipate where you will go. ***Choose several destinations in different directions so you have options in an emergency.*** If you have a car, keep a half tank of gas in it at all times. ***Become familiar with alternate routes as well as other means of transportation out of your area.*** If you do not have a car, plan how you will leave if you have to. ***Take your emergency supply kit*** and lock the door behind you. If you believe the air may be contaminated, drive with your windows and vents closed and keep the air conditioning and heater turned off. Listen to the radio for instructions.

Plans at School and Work: Think about the places where your family spends time: school, work and other places your family frequents. ***Talk to your children's schools and your employer about emergency plans.*** Find out how they will communicate with families during an emergency. If you are an employer, be sure you have an emergency preparedness plan. Review and practice it with your employees. A community working together during an emergency also makes sense. ***Talk to your neighbors about how you can work together.***

STEP THREE: BE INFORMED.

Some of the things you can do to prepare for the unexpected, such as assembling a supply kit and developing a family communications plan, are the same for both a natural or man-made emergency. However there are important differences among potential terrorist threats, such as ***biological, chemical, explosive, nuclear*** and ***radiological,*** that will impact the decisions you make and the actions you take.

STEP FOUR: REMAIN CALM.

Be prepared to adapt this information to your personal circumstances and make every effort to follow instructions received from authorities on the scene. Above all, ***stay calm, be patient and think before you act.*** With these simple preparations, you can be ready for the unexpected. If you have a working smoke detector, you understand that preparing makes sense. Get ready now.

ONLY YOU

Burn Debris Disaster Free

Smokey is counting on you to follow the rules for safely burning debris.
1. Check local laws on burning.
2. Don't burn on dry windy days.
3. Clear a 30-foot circle around debris before lighting fire.
4. Keep shovel, rake and water nearby.
5. Don't leave fire unattended by an adult, even for a minute.
6. Consider alternatives to burning:
composting, recycling, or hauling to a landfill.

REMEMBER, ONLY YOU CAN
PREVENT FOREST FIRES.

YOU'VE JUST MISSED THE FIRST SIGN OF BREAST CANCER IF YOU DIDN'T SEE THE SMALL DOT IN THE UPPER LEFT HAND CORNER. Because it can start that small inside your breast. That's why a yearly mammogram is a must, especially if you're over 50. Doctors agree that the older you get, the higher the risk of breast cancer. But early detection increases your chance of successful treatment. While you may have missed the first sign of breast cancer, a mammogram won't. For more information, please call the American Cancer Society at **1-800-ACS-2345**.

ONLY YOU

Burn Debris Disaster Free

Smokey is counting on you to follow the rules for safely burning debris.
1. Check local laws on burning.
2. Don't burn on dry windy days.
3. Clear a 30-foot circle around debris before lighting fire.
4. Keep shovel, rake and water nearby.
5. Don't leave fire unattended by an adult, even for a minute.
6. Consider alternatives to burning:
composting, recycling, or hauling to a landfill.

REMEMBER, ONLY YOU CAN PREVENT FOREST FIRES.

YOU'VE JUST MISSED THE FIRST SIGN OF BREAST CANCER IF YOU DIDN'T SEE THE SMALL DOT IN THE UPPER LEFT HAND CORNER. Because it can start that small inside your breast. That's why a yearly mammogram is a must, especially if you're over 50. Doctors agree that the older you get, the higher the risk of breast cancer. But early detection increases your chance of successful treatment. While you may have missed the first sign of breast cancer, a mammogram won't. For more information, please call the American Cancer Society at **1-800-ACS-2345**.

YOU'VE JUST MISSED THE FIRST SIGN OF BREAST CANCER IF YOU DIDN'T SEE THE SMALL DOT IN THE UPPER LEFT HAND CORNER. Because it can start that small inside your breast. That's why a yearly mammogram is a must, especially if you're over 50. Doctors agree that the older you get, the higher the risk of breast cancer. But early detection increases your chance of successful treatment. While you may have missed the first sign of breast cancer, a mammogram won't. For more information, please call the American Cancer Society at **1-800-ACS-2345.**
